## **RESTRICTION**

The final rejection mailed on 7/25/2003 is withdrawn in view of the supplemental amendment of 5/13/2003.

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-33, drawn to a detection circuit, classified in class 327, subclass 77.
- II. Claims 34-43, drawn to a transmitter circuit, classified in Class 710, subclass 107.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention I relates to the detection circuit while the invention II relate to the transmittercircuit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

## **CONCLUSION**

The applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
